Phone: MASKED FOR WEB

---

## OBJECTIVES

To work in an environment where I can make a significant impact in the quality, usability and usefulness of an application. To encourage learning and cohesiveness in a dynamic, fast paced team. To endeavor for perfection.

## TECHNICAL PROFICIENCIES

- *Desktop:* CVS, Flash, JAVA, J2EE, SVN
- *Web:* ASP, AJAX, CSS, HiJAX, HTML 4, HTML 5, JavaScript, jQuery, JSON, JSP, PHP, Prototype, XML
- *Mobile:* Android, iOS, Titanium
- *Database:* MySQL, SQL, SQL tuning

*Primary work has been with PHP, Linux, Apache and large scale MySQL databases for 9+ years.*

## WORK EXPERIENCE

WorthMonkey (2010 - Present)

*Founder*

Took WorthMonkey from initial concept, through seed funding, to launched product. Responsible for all software engineering and server architecture to support the core search engine. WorthMonkey received over 800,000 product lookups in the first 4 months online and received national attention from [Fox News](#), [Time Magazine](#), [New York Times](#), [Kurt the Cyberquy](#) and more.

Shopatron (2006 - 2010)

*Senior Software Architect*

Helped take Shopatron from a 12-person startup to a full company with over 100 employees. Worked on Shopatron core systems as well as front facing manufacturer websites. Responsible for optimizing high availability web pages and services, working with manufactures to clarify and scope projects, and continue evolution and interation of proprietary Content Management System (CMS). Directly worked with [Spy Optic](#), [Johnson Outdoors](#), [Panasonic](#), [Callaway Golf](#), [Brooks Running](#), [Thule](#), [Polaroid](#), [Louis Garneau](#), [Vitec Group](#), and [Klipsch](#) to scope, refine, plan and implement projects.

Form Fonts (2005 - 2006)

*Web Applications Architect*

Designed and implemented web applications architecture and procured all related technologies. Designed, implemented and tuned database architecture used by web applications and data crawlers. Designed and created security and monitoring algorithms to protect against leeching and account misuse.

Cisco Systems Inc. (2005)

*IT Engineer I*

Designed and developed concurrent programs for Oracle Applications.  
Designed and developed Java J2EE web application servlets for internal and external users.

Displaytronix (2002-2004)

*Web Development Programmer and Database Manager*

Developed, designed, and implemented web pages in PHP with a MySQL database backend. Replicated an existing Microsoft Access database in to a fully functional, web-based Purchase Order System.

Amgen – Sales, Marketing, and Information Systems (Summer 2003 Intern)

*Development Programmer*

Developed, designed, and implemented web pages in ASP, HTML, and Java for the Plumtree Portal. Designed and implemented web version of Siebel 2000 with Oracle backend through a Portal System.

## EDUCATION

California Polytechnic State University, San Luis Obispo

*Degree:* Bachelor of Science in Computer Engineering (March 2005)
